

Safetica Intelligent Data Security

Safetica's Intelligent Data Security protects sensitive data wherever your team works. Powered by AI, it delivers contextual awareness, reduces false positives, and stops real threats without disrupting productivity.

With Safetica, you gain full visibility and control over sensitive data, stay ahead of insider risks, ensure compliance, and secure critical cloud data.

Which Safetica Solution is Right for You?

Safetica offers **cloud** and **on-premises** solutions to meet a variety of security and infrastructure needs.

Safetica Intelligent Data Security Platform (Cloud)

The Safetica Intelligent Data Security Platform delivers AI-driven visibility and automation. It reduces noise and complexity while helping teams make faster decisions and maintain stronger protection and control of sensitive data, without adding to their workloads.

Best for organizations that:

- Operate in highly distributed, cloud-first environments
- Want lower upfront cost with no hardware or server management
- Need fast deployment and time to value
- Require scalable security that grows with the business
- Prefer built-in AI automation to reduce manual effort
- Benefit from automatic updates and maintenance

THREE PLANS

Standard - Essential Visibility: Full DLP with dynamic policies, user activity visibility, basic AI classification, limited cloud protection, reporting, and 12-month retention.

■ **BEST FOR:** Organizations with 200+ users that need strong manual control and foundational data protection.

Premium - Advanced Security: Everything in standard plus advanced AI automation, Smart Insights, expanded cloud protection, SIEM integration, enhanced reporting, custom categories, and 24-month retention.

■ **BEST FOR:** Growing organizations with 200 – 2,000 users that need deeper visibility, automation, and integration.

Enterprise – Large-scale Protection: Everything in Premium, plus advanced Smart Classification, expanded cloud scanning, unlimited reporting and admin access, and 3-year retention.

■ **BEST FOR:** Large or complex environments that require advanced scalability, governance, and extended data retention.

Safetica On-Prem

Safetica On-Prem delivers Intelligent Data Security with full control over security configurations, compliance tracking, and offline readiness. It helps highly regulated organizations protect sensitive data and meet strict regulatory requirements.

Best for organizations that:

- Operate in highly regulated industries with strict compliance requirements
- Cannot host security solutions in the cloud
- Have established, dedicated IT and security teams
- Prefer to maintain local infrastructure or their own data center
- Require full control over data location and storage

SINGLE PLAN

Traditional DLP and IRM deployed on-premises with manual controls.

- User, application, web, and data activity monitoring
- Policy-based protection and volume-based responses
- Basic Insights (no AI-driven automation)
- Transaction-based cloud security
- Rule- and template-based data classification
- Database-dependent data retention

Compare Plans

Modern, AI-driven security, managed in the cloud

Feature Highlights	Standard	Premium	Enterprise	On-Prem
Best for	Essential Visibility	Advanced Security	Large Multi-nationals	High Compliance
AI-Driven Insights	✗ (policy-based)	✓	✓	✗ (policy-based)
Data Classification	✓	✓ (AI Smart Tags)	✓ (AI Smart Tags+)	✓
Shadow Copy	✗	✓	✓	✓
M365 and GDrive Protection	✓	✓	✓	✓
SIEM Integration	✗	✓	✓	✓
Reporting Limits	5 Reports	20 Reports	Unlimited	30 Reports
Admin Accounts	5	15	50	Unlimited
Data Retention	12 Months	24 Months	36 Months	Custom (Local)
